

Team Number _____

Team Quality Assurance Exercise

Remember more points will be allocated if the whole team gets involved.

- 1) Pen the lambs and weigh each lamb.
- 2) Record each lamb's electronic ID tag number, using the proper equipment, and weight and calculate a pen average daily gain. The beginning weight was taken 150 days ago.

	<u>EID#</u>	<u>Today's weight</u>	<u>Beg. weight</u>	<u>Gain</u>	<u>ADG</u>
Lamb 1:	_____	_____	53 lbs.	_____	_____
Lamb 2:	_____	_____	47 lbs.	_____	_____
Lamb 3:	_____	_____	66 lbs.	_____	_____
Lamb 4:	_____	_____	57 lbs.	_____	_____
			Pen average daily gain		_____

- 3) Hold the last lamb weighed and properly set the lamb on its' rump and demonstrate hoof trimming.
- 4) Estimate the average yield grade of the four lambs _____
- 5) Demonstrate to the facilitator how to de-worm the lamb using 2 cc's per 10 kilograms of body weight of water as the de-wormer.
- 6) Determine the body temperature of the lamb. _____
- 7) Which of the four lambs has been tagged in the correct area of the ear? _____

Explain, using the steer ear, the proper placement of electronic identification tags.
